Jong-Jin Baik

Professor
School of Earth and Environmental Sciences
Seoul National University
Seoul 08826, South Korea
Email: jjbaik@snu.ac.kr
Phone: +82-2-880-6990, Fax: +82-2-883-4972

Education

Ph.D. in Atmospheric Science, 1989, Department of Marine, Earth and Atmospheric Sciences, North Carolina State University, U.S.A. (minor: Mathematics)
Thesis title: Tropical cyclone simulations with the Betts convective adjustment scheme
(advisors: Mark DeMaria and Sethu Raman)

M.S. in Meteorology, 1986, Department of Meteorology, Seoul National University, Korea
Thesis title: Evaporation associated with polar air outbreaks over the Yellow Sea
(advisor: Sung Sam Kim)

B.S. in Earth Science Education, 1984, Department of Earth Science Education, Seoul National University, Korea

Professional Careers

2007 –	Professor, School of Earth and Environmental Sciences, Seoul National University, Korea Also affiliated with Interdisciplinary Program of Computational Science and Technology, Seoul National University, Korea since 2017
2011	Visiting Professor, Graduate School of Wind Energy, Pohang University of Science and Technology (POSTECH), Korea
2003 – 2007	Associate Professor, School of Earth and Environmental Sciences, Seoul National University, Korea
2001 – 2003	BK21 Research Associate Professor, School of Earth and Environmental Sciences, Seoul National University, Korea
1995 – 2001	Associate Professor, Department of Environmental Science and Engineering, Gwangju Institute of Science and Technology, Korea
2000	Senior Visitor, Department of Applied Mathematics and Theoretical Physics, University of Cambridge, U.K.
1994 – 1995	Visiting Associate Professor, Center for Climate System Research, University of Tokyo, Japan
1993 – 1994	Senior Scientist, Global Environment Laboratory, Yonsei University, Korea
1991 – 1993	USRA Research Scientist, Severe Storms Branch, NASA/Goddard Space Flight Center, U.S.A.
1990 – 1991	Postdoctoral Fellow, Department of Marine, Earth and Atmospheric Sciences, North Carolina State University, U.S.A.

1990 Visiting Scientist, Hurricane Research Division, Atlantic Oceanographic and Meteorological Laboratory/NOAA, U.S.A.

Teaching Courses

Atmospheric thermodynamics (undergraduate course)
Atmospheric prediction and lab. (undergraduate course)
Atmospheric physics 2 (undergraduate course)
Mesoscale meteorology (graduate course)
Cloud physics (graduate course)

Current Students

advising one M.S. student, one Ph.D. student, and two postdocs

Ph.D. Graduates Supervised

Jae-Jin Kim, 2001, Gwangju Institute of Science and Technology
Thesis title: Flow and pollutant dispersion in urban street canyons
Affiliation: Professor, Department of Environmental Atmospheric Sciences, Pukyong National University, Korea
Sang-Hyun Lee, 2008, Seoul National University
Thesis title: Development of a vegetated urban canopy model and its application to urban heat island simulations
Affiliation: Professor, Department of Atmospheric Science, Kongju National University, Korea
Ji-Young Han, 2010, Seoul National University
Thesis title: Convectively forced mesoscale flows and aerosol-cloud interactions
Affiliation: Senior research scientist, Korea Institute of Atmospheric Prediction Systems, Korea
Young-Hee Ryu, 2012, Seoul National University
Thesis title: Urban impacts on local circulation and air quality
Affiliation: Associate professor, Department of Atmospheric Sciences, Yonsei University, Korea
Seung-Bu Park, 2013, Seoul National University
Thesis title: Turbulence coherent structures and scalar dispersion over heated urban surfaces
Affiliation: Associate professor, Department of Environmental Engineering, University of Seoul, Korea
Kyung-Hwan Kwak, 2014, Seoul National University
Thesis title: Microscale flow, gas-phase chemistry, and dispersion in urban areas
Affiliation: Associate professor, School of Natural Resources and Environmental Science, Kangwon National University, Korea
Gantuya Ganbat, 2015, Seoul National University
Thesis title: Local circulations in mountainous urban areas

Affiliation: Assistant professor, Faculty of Raw Materials and Environmental Engineering, German-Mongolia Institute for Resources and Technology, Mongolia

Hyunho Lee, 2016, Seoul National University

Thesis title: Effects of in-cloud turbulence on clouds and precipitation

Affiliation: Associate professor, Department of Atmospheric Science, Kongju National University, Korea

Jaemyeong Mango Seo, 2018, Seoul National University

Thesis title: Dynamics and modeling of thermally and orographically forced flows and convection

Affiliation: Postdoctoral fellow, Los Alamos National Laboratory, U.S.A.

Jambajamts Lkhamjav, 2018, Seoul National University

Thesis title: A quasi-stochastic collection model and cloud and precipitation modeling

Affiliation: Associate professor, Department of Applied Mathematics, National University of Mongolia, Mongolia

Beom-Soon Han, 2019, Seoul National University

Thesis title: Large-eddy simulations of urban turbulence, boundary layer, and air quality

Affiliation: Assistant professor, Department of Environmental Engineering, Inha University, Korea

Han-Gyul Jin, 2021, Seoul National University

Thesis title: Development of new accretion parameterizations and their applications to cloud and precipitation modeling

Affiliation: Assistant professor, Department of Atmospheric Sciences, Pusan National University, Korea

Sungju Moon, 2021, Seoul National University

Thesis title: High-dimensional Lorenz systems, atmospheric predictability, and data Assimilation

Affiliation: Assistant professor, Department of Data, Media, and Design, Nevada State University, U.S.A.

Tanvir Ahmed, 2021, Seoul National University

Thesis title: Observed characteristics and modeling of monsoonal precipitation in Bangladesh and northeast India

Affiliation: Associate professor, Department of Physics, Shahjalal University of Science and Technology, Bangladesh

Jihoon Shin, 2023, Seoul National University

Thesis title: Development of a stochastic convection parameterization and its application to climate modeling

Affiliation: Assistant professor, Department of Environmental Atmospheric Sciences, Pukyong National University, Korea

Joohyun Lee, 2023, Seoul National University

Thesis title: Cloud and precipitation studies using disdrometer observations and models

Affiliation: Postdoctoral fellow, Department of Atmospheric Science, Kongju National University, Korea

Seong-Ho Hong, 2025, Seoul National University

Thesis title: Observed characteristics and numerical modeling of precipitation in urban areas

Affiliation: Postdoctoral fellow, Research Institute of Basic Sciences, Seoul National University, Korea

Abeda Tabassum, 2025, Seoul National University

Thesis title: Exploring urban heat islands, local winds, and urban heat mitigation in Dhaka, Bangladesh

Affiliation: Postdoctoral fellow, Research Institute of Basic Sciences, Seoul National University, Korea

Research Interest

Cloud microphysics
Numerical precipitation prediction
Thermally forced mesoscale flows
Urban heat islands
Urban flow, convection, and dispersion
Urban impacts on weather and air quality
Nonlinear dynamics and chaos of thermal convection

Honors and Awards

Woonjai Award, Korea Meteorological Society, 2024
Teaching Award, College of Natural Sciences, Seoul National University, 2008, 2016
Max Eaton Prize, American Meteorological Society, 1989
Top honor graduate, Department of Earth Science Education, Seoul National University, 1984

Professional Activities and Services (some listed)

Director of Atmospheric Environment Research Institute, Seoul National University, 2014-2016
Chair of Atmospheric Sciences Program, School of Earth and Environmental Sciences, Seoul National University, 2009-2011
Associate Director of School of Earth and Environmental Sciences BK21 Program, Seoul National University, 2009-2011
Organizer of Workshop on Local Meteorology, Korea, 2008, 2010
Co-organizer of The University Allied Workshop on Climate and Environmental Changes, Korea, 2009
Co-convenor of International Workshop on Climate Environment System, Korea, 2008
Executive Director of Climate Environment System Research Center (CES), Seoul National University, 2003-2009
Co-convenor of Typhoons and Mesoscale Weather Session, Asia Oceania Geosciences Society, Singapore, 2004, 2005
Co-organizer of The University Allied Workshop on Climate and Environmental Modeling, Korea, 2005

Reviewer of papers submitted to: Journal of Applied Meteorology and Climatology, Journal of the Atmospheric Sciences, Atmospheric Environment, Environmental Fluid Mechanics, Physics of Fluids, Theoretical and Applied Climatology, Journal of Wind Engineering and Industrial Aerodynamics, Theoretical and Computational Fluid Mechanics, Computer Methods in Applied Mechanics and Engineering, Wind and Structures, Journal of the Air and Waste Management Association, Journal of Geophysical Research, Bulletin of the American Meteorological Society, Air Quality, Atmosphere and Heath, Journal of Environmental Quality, International Journal of Heat and Fluid Flow, Computers and Fluids, Quarterly Journal of the Royal Meteorological Society, Environment and Planning B, Building Simulation: An International Journal, Journal of Oceanography, Asia-Pacific Journal of Atmospheric Sciences, Advances in Atmospheric Sciences, International Journal of Environmental Technology and Management, Environmental Science and Pollution Research, Atmospheric Chemistry and Physics, Monthly Weather Review, Meteorology and Atmospheric Physics, Boundary-Layer Meteorology, CLEAN - Soil, Air, Water, International Journal of Geosciences, Urban Forestry & Urban Greening, Urban Climate, Remote Sensing, Atmospheric Pollution Research, Environmental Pollution, Advances in Meteorology, Aerosol and Air Quality Research, Scientific Reports, Meteorological Applications, Air Quality, Atmosphere and Health, Journal of Climate

Editorial Board: Asia-Pacific Journal of Atmospheric Sciences, editor, 2011-2015
Atmosphere, Korean Meteorological Society, chief editor, 2009

Publications

215. Park, K., and J.-J. Baik, 2026: Diurnal evolution of synergistic interactions between urban heat islands and heat waves: An extreme heat wave case study in Seoul, South Korea. Weather and Climate Extremes, 51, 100854.
